

Sustainable Value Plan 2030

Health

Create a healthy society through the process of prevention, diagnosis and treatment in healthcare.

Social Issues

One of the goals set out under SDGs is to “achieve universal health coverage (UHC), ensuring that all people can access essential quality health services without facing financial hardship.” UHC requires the development of medical infrastructure that makes healthcare and medical services readily available to all, improvement in medical care quality and society that places top priority on health, with emphasis on disease prevention and early detection.

Fujifilm Group's Goals under SVP 2030

(Priority Issues)

1. Fulfill unmet medical needs.
2. Improve accessibilities to medical services.
3. Contribute to early disease detection.
4. Contribute to health promotion and beauty.
5. Promote management of a healthy workplace.

Health is a theme of great importance and attracts the highest level of interest from people. However, there are many issues to be addressed—not only in terms of unmet medical needs, but also other issues that include the medical divide, the shortage of doctors, the increased burden on doctors and high medical expenses. Also protecting our employees' health is a significant responsibility for the company because our employees are the foundation of our business activities. Fujifilm Group began its X-ray film in 1936, soon after the company was established. Today, the scope of our businesses have expanded into prevention, diagnosis and treatment of diseases in our drive to become a “total health company.” We will mobilize its technologies, products and services to resolving various issues and contributing to further improving the quality of medical care and better health for all.

The Key Points in FY2018 Activities

OUTPUT

OUTCOME
