Priority Human Rights Issues That the Fujifilm Group Must Address

Following the above process, in FY2018, the Fujifilm Group identified the following potential human rights issues that we should address as a Group (see the table on the next page, Human Rights Impact Assessment in Existing Business). Out of these issues, we have identified the following two areas as salient human rights issues and have begun to take concrete action: (1) Actions for suppliers, contractors and cooperation companies, and (2) Actions for employees.

Human Rights Impact Assessment in Existing Business

(Priority human rights issues that the Fujifilm Group must address are colored red)

Targeted stakeholders	Potential human rights issues that the Fujifilm Group must address	Relevance to business segments		
		Imaging solutions (Digital cameras, etc.)	Healthcare & Material Solutions (Highly functional materials, etc.)	Document Solutions (Office products and printers, etc.)
Customers, etc.	Product safety	◎	◎	◎
	Personal data protection	◎	◎	◎
	Human rights infringement by unintended use of products and services	△	○	△
	Consideration of rights of human subjects and sample providers for R&D in the healthcare business	—	◎	—
Employees of suppliers, contractors and cooperation companies	Appropriate labor conditions, labor management, health and safety management	◎	○	◎
	Consideration for rights and safety of foreign workers (especially in factories)	◎	○	◎
Local communities	Infringement of local residents' rights (including decrease in assets, degradation of daily life environment, and health damage) due to environmental damage caused by inappropriate management of chemical substances or illegal dumping	△	△	△
	Decrease in assets, degradation of daily life environment for local residents due to inappropriate procurement of raw materials	○	△	◎
Employees	Appropriate labor conditions, labor management, and health and safety management	○	○	○
	Adverse impacts such as mental or physical damage and decrease in opportunities due to discrimination, harassment, and infringement of privacy	○	○	○
	Health damage due to inappropriate management of chemical substances, biomaterials, etc. in production and R&D	◎	◎	○

4.5.4 Prevention and Mitigation of Adverse Impact on Human Rights and Progress

(1) Actions for suppliers, contractors and cooperation companies

The Fujifilm Group promotes actions for respecting human rights among suppliers, contractors and cooperation companies, which is one of the priority human rights issues, mainly within the framework of ethical procurement. We clearly specify the Procurement Policy and Request to Suppliers as a procurement approach to gain the understanding of suppliers involved in the Group's product manufacturing regarding the importance of CSR management. We aim to work together to resolve human rights issues. In the Sustainable Value Plan 2030 (SVP2030), the CSR mid- and long-term plan announced in 2017, we committed to reinforce the CSR foundations such as labor, human rights, environment, and corporate ethics throughout the supply chain—which we appointed as one of the priority areas.

The Group's ethical procurement program comprises (1) Notifying policies etc. to suppliers, (2) Risk assessment in suppliers, (3) Instruction activities for suppliers, and (4) Improvement activities for suppliers. As well as elimination of forced labor and child labor, we provide various checks and support for suppliers, including labor management, occupational health and safety, and consideration for migrant workers.

Based on the risk assessments that Fujifilm and Fuji Xerox have conducted using a self-checklist on labor, human rights, the environment, corporate ethics etc., our primary suppliers in Japan, Europe, and the United States have been recognized as low CSR risk. In FY2018, we have identified 46 suppliers with CSR risks in China and Vietnam, and conducted onsite "Visit

and Check” by expert team from the Fujifilm Group. Leading examples of issues related to the human rights of employees at suppliers, issues in the areas of labor management (excessive continuous work attendance and overtime work, etc.), shortage of fire prevention facilities such as sprinklers and fire detection devices, non-use or inadequate management of the necessary protective gear, inadequate management of hazardous wastes, etc., were identified. Requests for improvement have been issued to the suppliers accordingly, and improvements are underway based on their respective improvement plans. For more details about measures of ethical procurement, see *2.4 Supply Chain Management* in this report.

Fujifilm Group Procurement Policy and Request to Suppliers  URL: <https://www.fujifilmholdings.com/en/sustainability/vision/procure.html>

(2) Actions for our employees

We raise awareness on priority human rights issues among Group employees in their new employee training programs and training programs for new managerial personnel. The training programs for new managerial personnel focus on labor management in general, including prevention of long working hours and mental health measures, as well as harassment prevention. Regarding overtime working hours, changes in monthly overtime is monitored, and warnings and guidance to business division exceeding the designated levels are issued and the necessary corrective measures are implemented continuously. We are addressing the harassment issues with implementation of measures adapted flexibly to conditions in each company and business division, in addition to regular training programs. In fiscal 2018, for instance, we conducted customized harassment trainings for business divisions that were likely to show a high level of potential and actual risk. For risk managers, trainings to provide further details on how to handle counseling cases were conducted. For occupational health and safety efforts, see *4.3 Health and Safety* in this report.

In April 2019, we revised the Fujifilm Group Charter for Corporate Behavior and the Code of Conduct to adopt more globally generic contents, and enhanced descriptions concerning human rights such as respect for diversity and elimination of discrimination, prevention of bullying and harassment, promotion of occupational health and safety, and health promotion. The revised Charter for Corporate Behavior and Code of Conduct was translated into 24 languages as part of our global education program, including disseminating the company’s human rights statement to all Group employees.

(3) Human rights risk management

The Fujifilm Group conducts annual screening of priority risk issues (including potential ones) in business processes at all its organizations. All the organizations including Group companies identify priority risk issues, plan and execute measures, and manage their results. Priority issues for the entire Group, based on the review results for each organization, and the results of action implemented are reported and deliberated on by the Fujifilm Holdings ESG Committee and reported to the Board of Directors. This process is applied also to human rights issues. Human rights are specified explicitly as one of the perspectives requiring attention at each company in review of our priority risk issues, with various human rights issues being managed as elements for review in group-wide risk mappings.

In the 2017–2018 study on priority risk issues, risks related to work accidents, harassment, product safety, labor management, employee safety, personal data management, environmental pollution, etc., were pointed out as major issues related to human rights. The number of organizations that identified labor management and harassment, which are designated as prioritized human rights issues related to our employees, as actual or potential risks stood at 91. All of these organizations have developed and implemented preventive and mitigating measures. For more details about group-wide risk management, see *2.2.3 Compliance & Risk Management Promotion Structure* in this report.

(4) Review on group-wide human rights-related activities

FUJIFILM Holdings conducts individual dialogues with experts in business and human rights, who were invited to the 2018 Business and Human Rights Conference in Tokyo held by Caux Round Table (CRT) Japan, to review our human rights initiatives. This included a dialogue about FY2017 results.

●FY2018 Dialogue with human rights experts

Date: September 12, 2018

Location: Tokyo, Japan

Participants: Experts

Livio Sarandrea, Manager and Chief Adviser of Regional Program on Business and Rights, United Nations Development Programme (UNDP) Bangkok Regional Hub

William Rook, Regional Manager, Middle East, Institute for Human Rights and Business

FUJIFILM Holdings

Mari Kojima, Manager, CSR Group, Corporate Planning Division

Toshihiko Hoshino, Senior Expert, CSR Group, Corporate Planning Division

Moderator

Minoru Matsuzaki, Caux Round Table (CRT) Japan
