

Progress of “Design for Environment”

The Fujifilm Group has been implementing resolutions to environmental issues for our products and services to promote design for the environment, including a mechanism to set targets for environmental performance at the product design stage, introduction of a quantitative evaluation through lifecycle assessment, and introduction of the Green Value Products Certification System to certify products with reduced environment impact or that contribute to reductions in the environmental impact.

¹ Joint Article Management Promotion Consortium
² ABS (Access and Benefit-sharing): Access to genetic resources and the fair and equitable sharing of benefits arising from their utilization
³ chemSHERPA: A scheme that facilitates sharing information on chemical substances in products

3.1.3 EMS: Certification/Audit/Verification

Status of EMS Certification and Audit in FY2018

Certification/audit/verification system by specialized companies with International Certification (ISO14001, EMAS)	Coverage: 60%
Certification/audit/verification system by internal experts	Coverage: 40% Our internal experts communicate specific instructions based on the internal FRC rules and FRC policy for activities, and verify the activities reported through environmental intranet.
Total Coverage of Environmental Management System (EMS) for our company (The sum of the above two)	100%

3.1.4 Response to Environmental Laws and Regulations

Legal Compliance and Reports on Complaints in FY2018

In 2018, there was one violation (which was overseas) of environment-related laws and no customer complaints, and two incidents (of which one was overseas). The legal violation issue concerned management of the transportation of hazardous materials—preventive measures have already been completed.

	Japan	Overseas	Group total
Number of legal violations (number of cases solved)	0 (0)	1 (1)	1 (1)
Number of complaints (number of cases solved)	0 (0)	0 (0)	0 (0)
Number of incidents (number of cases solved)	1 (1)	1 (1)	2 (2)

Responses to Environment-Related Complaints and Legal Violations in FY2018*1

Company/Site name	Description	Responses
FUJIFILM Wako Pure Chemical Corporation	Leakage and runoff of harmful substances when delivered by tanker.	Review of operational procedures and moving containers inside the breakwater. Preventive measures have been completed.
FUJIFILM Manufacturing U.S.A. Inc.	Lack of education for transporters and inadequate labeling*2	Education on how to handle hazardous materials for transporters and proper labeling have been completed.
FUJIFILM Manufacturing U.S.A. Inc.	Leakage of hazardous materials during transportation	Introduction of double layered containers to prevent leaks has been completed.

*1 Relatively minor violations have been excluded.

*2 Occurred in FY2017; however, administrative action was implemented in 2018.
