

EZ INKJET MEDIA. AFFORDABLE QUALITY.

Fujifilm large format inkjet media is a range of wide format and cut sheet inkjet photo papers, canvas and matt bond papers, suitable for use with the latest large format inkjet printers from EPSON, HP and Canon.

Within our successful professional inkjet media portfolio, our EZ media is a budget friendly range for the photofinisher, prolab and photo retailer. To experience the difference, contact us now for a media swatch book.

Large format printing has never been easier and more affordable!

Our range of EZ inkjet media

EZ Gloss+ & EZ Satin+ — 250 gsm.

Instant dry, universal compatible PE coated microporous photo papers with excellent whiteness suited for portraits, posters and graphic arts reproductions.

EZ Pearl — 300 gsm

Heavy weight instant dry, universal compatible PE coated microporous photo paper with outstanding stiffness suited for portraits, posters and graphic arts reproductions.

EZ Matt Bond — 120-170-230 gsm

Instant dry, universal compatible matt coated paper with high resolution and outstanding contrasts suited for graphic output, presentations and posters.

EZ Natural Canvas — 340 gsm

Free of optical brightener, natural colour canvas with a high quality cotton-polyester fibre mix . Universally compatible, water resistant and light resistant with pigmented inks. Suitable for photo, graphic arts and fine arts reproduction and for stretching and framing.

All media are optimised for use with pigment ink printers from EPSON, HP and Canon. ICC Profiles for colour management are available on www.print-it-large.eu/downloads and can be easily downloaded, together with instructions for their use.

Our EZ Natural and EZ White Canvases are B1 flame retardant certified.
