WHAT IS MIRAGE?

Mirage is our professional print software solution for **Macintosh** and **Windows**. Although mostly referred to as a professional printer driver, Mirage is in fact a RIP. This is due to the fact that RIP solutions often times are considered to be expensive, difficult to set up, maintain and operate. Mirage is none of those things. Our software is available for the Adobe applications (Adobe™ Photoshop™, InDesign™, Illustrator™, Photoshop Elements and Lightroom™) as well as a **Stand-Alone** without a host application.

WHY USE MIRAGE?

Mirage offers several advantages over the printer driver and other RIP solutions. In comparison to the printer driver, Mirage will offer you a **professional** and **secure** handling, well arranged settings and a real print preview. **W**hat **y**ou **s**ee **i**s **w**hat **y**ou **g**et.

In comparison with other RIP solutions, Mirage offers easy handling with no hidden, complicated or unnecessary features, all at a comparably better ROI.

Working with Epson HTMs, Mirage provides a better print quality than most RIP solutions, working with their own, for CMYK data optimized HTMs. Mirage will make the best use of the maximum RGB gamut. Additionally, to the above, Mirage supports an **unlimited number** of printers of various sizes.

WHAT CAN MIRAGE DO FOR ME?

With its easy set up and use, Mirage will be the perfect RIP for your customers. With the real soft proof preview of all print jobs, trial and error is a thing of the past leaving you with happy customers who print more. With over 20 years experience on the Fine Art market, Mirage will help you sell more printers, ink and media.

Additionally, to the software, our trained personnel offers fast, reliable and professional support for the software
