Chemicals for FUJI FRONTIER CP-48S process

FUJIFILM offers the CP-48S II chemical system for the FUJI Frontier 330/350/355/370/375/390 range of minilabs.

These chemicals are available as FUJI CP48S II cartridges, giving easy and safe use for the minilab operator.

For high volume users there is CP-48HV II chemistry available. This gives significantly reduced operating costs, as long as you process enough paper to use it successfully.

The following FUJIFILM CP-48 Replenisher kit, as also start-up kits are available:

Product	To make	Cat No
FJ CP48SII PC Kit x 2 ⁽¹⁾	-	994 475
FJ CP48HVII PC Kit x 2	-	995 118
FJ CP48SII P1	1 x 4.2L	994 483
	1 x 10L	994 491
FJ CP48SII P2	1 x 4.2L	994 483
	1 x 10L	994 517
FJ Superconditioner Tablets (FSC-100)	20 x (100 x 5L)	999 721

⁽¹⁾ For Optimum processing performance for those minilabs that have high production volumes, FUJIFILM advises to use CP-48HV.

More information about this CP-48 chemistry for use in Frontier Minilabs, such as mixing instructions and full technical details are available on our [Esclusivo](#) web site (for authorised users only).
