

ENVIRONMENTAL POLICY

This Environmental Policy relates to all FUJIFILM Australia's operations. Our commitment is to reduce our direct and indirect impacts on the environment.

FUJIFILM Australia principle activities focus on the **Sales and servicing of imaging equipment, consumables, and integrated solutions to consumer, health, printing and industrial customers.**

Specifically, FUJIFILM Australia activities focus on:

- The sale, repair, and technical support of cameras, consumables and accessories to the public consumer, via 3rd party retail outlets, its own retail outlet and its own E-Commerce platform
- The sale, installation, servicing and repair of photograph producing hardware to retail outlets, together with consumable paper and processing chemicals
- The development, sale, servicing and technical support of software solutions used with photograph producing hardware
- The sale, installation servicing, repair and technical support of imaging software and hardware to medical and veterinary professions, together with consumables and processing chemicals. This is also achieved through 3rd Party partnerships
- The sale, installation servicing, repair and technical support of litho plate pre-press processing software and hardware to the printing industry, and pre-press consumables & processing chemicals
- The manufacture, sale, and technical support of chemicals, coatings and post-press products for use in the offset lithographic and flexographic printing industries
- The sale, installation servicing, repair and technical support of digital printing software and hardware to the printing industry, together with inks and other consumables
- The sale and repair of lenses, binoculars and projectors to the entertainment and security industries
- The sale of recording media products to system integrators, data centres, etc
- The sale of industrial products to the micrographic, NDT and manufacturing industries
- The sale, installation, support, and data management of digital signage software and hardware to retail outlets

The Environmental Management System relates to these activities on-site, and also to off-site activities carried out by Technicians, including installation and servicing of equipment. The System underpins our environmental commitment and activities enabling us to deliver on our environmental policy and objectives in a systematic and robust way, as modelled in the ISO 14001:2015 Australian Standard.

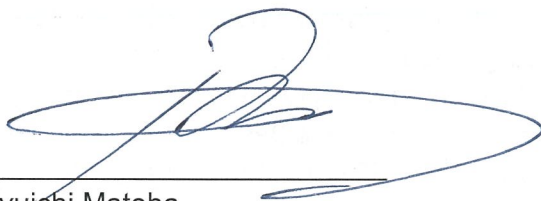

FUJIFILM's environmental commitments include:

- To prevent pollution;
- Increasing the amount of recycled content in the raw materials purchased by the facility;
- Maximising the amount of packaging that is re-used or recycled;
- Reducing the amount of solid waste going to landfill;
- Ensuring that chemistry held on site is handled and stored correctly;
- Assisting our customers and consumers to ensure correct disposal of waste, and wherever possible recycling of waste;
- Promoting environmental awareness, including the Environmental Policy, among employees;
- Achieving compliance with environmental legislation and other associated obligations;
- Reporting to the necessary stakeholders, such as APCO, and to our parent, Fujifilm Corporation through Fujifilm Asia Pacific
- Continual review and improvement of our environmental practices.

The Board of Directors fully supports the FUJIFILM Environmental Management System and will review the objectives annually at the Management Review Meeting to ensure continuous improvement and compliance.

All staff members are expected to adhere with the policy and the Environmental Management System.

Ryuichi Matoba
CHIEF EXECUTIVE OFFICER
FUJIFILM Australia Pty Ltd

For and on behalf of the Board of Directors
