FUJIFILM

Chemicals for Noritsu QSS-xxxx Minilabs at standard 45 seconds

FUJIFILM can supply a complete range of products for use in Noritsu equipment, old and new. All products are fully tried and tested and can be used with complete confidence.

Selection of the best chemistry for your processor depends on developer time and how much paper you put through you processor. Most locations find the EnviroPrint Developer Replenisher MP73 AC (73 ml/m²), combined with EnviroPrint Bleach-Fix Replenisher 70 AC (70 ml/m²) an ideal combination. Other, very busy locations may select chemistry with a lower replenishment rate. Quieter locations may need chemistry with higher replenishment rates in order to maintain a good process.

The typical products required for this situations on QSS-31xx, QSS-32xx, QSS-33xx, QSS-34xx, QSS-35xx and QSS-37xx at standard development time of 45 seconds are:

Product	To make	Cat No
EnviroPrint Developer Replenisher MP160 [1]	4 x 10L	991 273
	50L	991 281
EnviroPrint Developer Replenisher MP108 [2]	4 x 10L	990 911
	50L	990 994
EnviroPrint Developer Replenisher MP73 AC [3]	4 x 10L	992 909
	50L	992 917
EnviroPrint Developer Replenisher MP60 AC [4]	4 x 10L	994 343
	50L	994 368
EnviroPrint Bleach-Fix Replenisher 215 AC	2 x 10L	995 746
	50L	995 753
EnviroPrint Bleach-Fix Replenisher 108 AC	2 x 10L	995 712
EnviroPrint Bleach-Fix Replenisher 70 AC	2 x 5L	995 662
	2 x 10L	995 670
EnviroPrint Bleach-Fix Replenisher 55 AC	2 x 10L	995 654
EnviroPrint Super Stabilizer & Replenisher AC	2 x (10 x 10L)	990 630

[1] In combination with EnviroPrint Developer Replenisher MP160 (160 ml/m²), EnviroPrint Bleach-Fix Replenisher 215 AC (215 ml/m²) should be used.
[2] In combination with EnviroPrint Developer Replenisher MP108 (108 ml/m²), EnviroPrint Bleach-Fix Replenisher 108 AC (108 ml/m²) should be used.
[3] In combination with EnviroPrint Developer Replenisher MP73 AC (73 ml/m²), EnviroPrint Bleach-Fix Replenisher 70 AC (70 ml/m²) should be used.
[4] In combination with EnviroPrint Developer Replenisher MP60 AC (60 ml/m²), EnviroPrint Bleach-Fix Replenisher 55 AC (55 ml/m²) should be used.

Starters	Conc	Cat No
EnviroPrint Universal Developer Starter [5]	6 x 1L	979 328
EnviroPrint Developer Starter AC [6]	6 x 1L	971 655

[5] EnviroPrint Universal Developer Starter is used to make a fresh Tank Solution with EnviroPrint Developer Replenisher MP160 & EnviroPrint Developer Replenisher MP108

[6] EnviroPrint Developer Starter AC is used to make a fresh Tank Solution with EnviroPrint Developer Replenisher MP73 AC & EnviroPrint Developer Replenisher MP60 AC

More information about this chemistry for use in Noritsu QSS-xxxx (45 seconds) minilabs, such as mixing instructions and full technical details are available on our Esclusivo web site (for authorised users only).
