

## Case Study

# PORTO LEGENDS By OCUBO (Portugal)

FP-Z5000 was adopted in PORTO LEGENDS -THE UNDERGROUND EXPERIENCE-, an immersive virtual show in Porto, Portugal.

## Historical Amusement in Portugal

“Porto Legends – The underground experience-” is an entertainment show created by OCUBO Studio, that introduces the legendary story in Porto, a northern city in Portugal. The show is played in a underground construction. 38pcs of FP-Z5000 are used in this show.

## Complex space

As the place has the complex structure such as many arches and pillars in a narrow space, it is difficult to get enough space for projecting a large screens with a short projection distance. Especially, the most serious issue was that they need many projectors for “Port Legends” settings. However, FUJIFILM Ultra Short Throw projector, FP-Z5000 gives them a solution.

## Function for Easy Installation

Fujifilm FP-Z5000 has its feature in the special lens.

As its throw ratio is 0.34, it can throw over 300inches projection with projection distance by 3 meters/9.8 feet.

Also, the world's first folded two axis rotatable lens has the wide lens shift range( 82% vertically, 35% horizontally) besides it can throw off-set projection.

FP-Z5000 equipped with the special lens supply OCUBO with the perfect solution as Eduardo Canessa, Project Manager of Ocubo says in the movie below.
