

# Create the world-view of cuisine using restaurant space

TREE by NAKED yoyogi park

## Point 1 Provides visual effects with an inconspicuous and small chassis device

**Users' benefit** In addition to the thin body with only 10.8 cm thickness, the projection direction can be shifted only by rotating the lens.

**Supporting feature** Dual-axis rotating lens

FP-Z5000 is a chassis device with 10.8 cm thickness. FP-Z5000, which is flatter and smaller than conventional ultra-short-throw projectors, allows for inconspicuous installation compared to conventional projectors. FP-Z5000 has an inconspicuous design, making it hard to catch customers' eyes, making it the best device to create a comfortable atmosphere.

Easy-to-install and -carry design

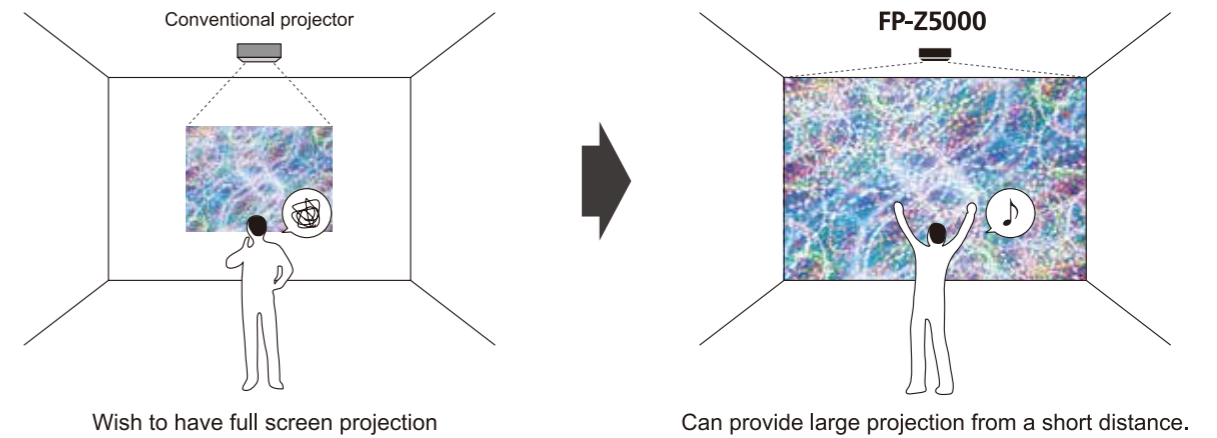

HDMI 3

## Point 2 Achieves a large screen projection even in a room with a short projection distance.

**Users' benefit** Experience a 300-inch dynamic screen with only a 2.3-meter projection distance.

**Supporting feature** Ultra-short-throw

FP-Z5000 has an ultra-short-throw lens and allows for a large 300-inch screen projection with only a 2.3-meter projection distance and one projector. It can create a spatial atmosphere with a few projectors and realizes simple spatial design.

## Point 3 An easy-to-install projector even on a congested ceiling

**Users' benefit** Easy adjustment achieved by the larger lens shift range compared to conventional projectors

**Supporting feature** Class-leading shift range

FP-Z5000 has the class-leading lens shift and can be adjusted with the projection screen position within a wide range of 82% vertically and 35% horizontally. Therefore, it is convenient when it needs to be installed in a room with a congested ceiling with items such as air conditioners.
