

A technical drawing of a circular object, likely a cross-section of a pipe or a similar cylindrical component. The drawing consists of several concentric circles. The outermost circle is the largest. Inside it, there are several more circles of decreasing size. A crosshair, consisting of a horizontal and a vertical line, is drawn through the center of the circles. The circles are drawn with varying line weights, suggesting different materials or layers. The crosshair is drawn with thin lines.
