FUJIFILM Speciality Ink Systems is confident that its gender pay gap does not stem from paying men and women differently for the same or equivalent work. Rather its gender pay gap is the result of the roles in which men and women work within the organisation and the salaries these roles attract. All roles are open to males and females.

This can be seen in the table above depicting pay quartiles by gender. In order for there to be no gender pay gap, there would need to be an equal ratio of men to women in each quartile.

Our pay policy provides for salary and bonus for all staff. Salary levels are fixed dependant on the job level of the individuals. When recruiting, person and job specifications will be limited to those requirements that are necessary for the effective performance of the job. Candidates for employment, development or promotion will be assessed objectively against the requirements for the job.
