A range of stencil remover concentrates formulated with high levels of active ingredients to ensure the complete removal of emulsion, and pH balanced to guarantee consistency. Xtend stencil removers will rapidly remove all direct, direct/indirect and capillary stencils. Can be applied manually by brush, or via the Xtend air powered spray pump system.

### Stencil Remover 1:20
- Concentrates can be diluted up to 1:20 ratio with water
- Economical in use
- Have no reaction with hard water, avoiding sediment
- Formulated without chemicals listed under California’s Proposition 65 (XSR-220 only)

### Stencil Remover 1:55
- Concentrates can be diluted up to 1:55 ratio with water
- Highly economical in use
- Have no reaction with hard water, avoiding sediment
- Ideal ratio for drum quantities, as used with Xtend pump spray system
- Formulated without chemicals listed under California’s Proposition 65 (XSR-255 only)
- Ideal for drum quantities, as used with Xtend spray pump system

Xtend stencil removers are available in 1 gallon and 5 gallon containers.

### Storage
Containers should be tightly closed immediately after use. Xtend Stencil Removers should not be stored in direct sunlight or extreme temperatures. Refer to Material Safety Data Sheet (MSDS) for materials and conditions to be avoided.

In the interest of maximum shelf life, ideal storage temperatures are between 41°F (5°C) and 77°F (25°C). When stored in a cool environment, Xtend stencil removers are expected to have a shelf life of a minimum 36 months from the date of manufacture.

### Safety and Handling
Refer to MSDS for safety, handling, and waste disposal information.

### Application Instructions

1. Mix to desired ratio with water.
2. Apply to both sides of screen with brush or spray.
3. Allow 1-2 minutes dwell time for stencil remover to work effectively.
4. Pressure wash screen to remove stencil.

**Note:** Do not allow stencil remover to dry on screen as this may fuse the emulsion to the mesh, and make decoating very difficult.

The information and recommendations contained in this Technical Data Sheet, as well as technical advice otherwise given by representatives of our Company, whether verbally or in writing, are based on our present knowledge and believed to be accurate. However, no guarantee regarding their accuracy is given as we cannot cover or anticipate every possible application of our products and because manufacturing methods, printing stocks and other materials vary. For the same reason, our products are sold without warranty and on condition that users shall make their own tests to satisfy themselves that they will meet fully their particular requirements. Our policy of continuous product improvement might make some of the information contained in this Technical Data Sheet out of date and users are requested to ensure that they follow current recommendations.
