Each Xtend ink degradent is a carefully balanced combination of solvents and surfactants, which ensure effective ink removal at the end of a print run. Using solvents designed to break down and dissolve ink resins, Xtend Ink Degradents clean quickly, and efficiently, reducing the need for haze removers later in the screen cleaning process. Xtend ink degradents can be applied manually or dispensed via the Xtend air powered spray pump system. They are also suitable for use with automatic screen cleaning machines.

**GreenLine Ink Degradent 480 Concentrate**
- Designed to work effectively on UV and plastisol inks; also works with most solvent based inks
- Can be mixed with water and XSR Stencil Remover 1:20 or 1:55 to work as a One-Step product

**Ink Degradent 500**
- Designed to work effectively on UV inks; also works with most solvent based inks
- High flashpoint vs. other similar products
- Not recommended for use with cyanoacrylate adhesives

**Ink Degradent 505**
- High performance ink degradent for use with all ink types
- Quick cutting action; reduces need for haze remover
- Not recommended for use with cyanoacrylate adhesives

**Ink Degradent 515**
- High performance ink degradent for use with all ink types
- Designed for use in automatic screen cleaning units

**Ink Degradent 520**
- Designed to work effectively on UV and plastisol inks; also works with most solvent based inks
- Compatible with all types of frame adhesives

**Ink Degradent 605**
- High performance ink degradent for use with all ink types
- Not recommended for use with cyanoacrylate adhesives

*About VOC Content: Low-VOC formulations are required in certain areas of the United States. The VOC amounts in these products do not comply with the VOC limits for certain applications set forth in California's South Coast Air Quality Management District Rule 1171(c)(1) and may not comply with regulatory restrictions in other areas of the United States. The end-user must check with the appropriate air pollution regulatory agency to determine whether Low-VOC formulation is required for the end-user's intended purpose.

**Use 480 concentrate and mix 903 grams/liter, if you use as a One-step product mix 455 grams/liter**
Safety and Handling

Refer to MSDS for safety, handling and waste disposal information.

The information and recommendations contained in this Technical Data Sheet, as well as technical advice otherwise given by representatives of our Company, whether verbally or in writing, are based on our present knowledge and believed to be accurate. However, no guarantee regarding their accuracy is given as we cannot cover or anticipate every possible application of our products and because manufacturing methods, printing stocks and other materials vary. For the same reason, our products are sold without warranty and on condition that users shall make their own tests to satisfy themselves that they will meet fully their particular requirements. Our policy of continuous product improvement might make some of the information contained in this Technical Data Sheet out of date and users are requested to ensure that they follow current recommendations.

Storage

Containers should be tightly closed immediately after use. Xtend Ink Degradents should not be stored in direct sunlight or extreme temperatures. Refer to Material Safety Data Sheet (MSDS) for materials and conditions to be avoided. For maximum shelf life, ideal storage temperatures are between 41°F (5°C) and 77°F (25°F).

Stored in the recommended environment, Xtend ink degradents are expected to have a shelf life of a minimum 36 months from the date of manufacture.

Safety and Handling

Refer to MSDS for safety, handling and waste disposal information.

---

Application Instructions

1. Apply liberally to both sides of screen with brush or spray system.
2. Concentrate on cleaning the image area using circular brush strokes.
3. Pre-rinse with low pressure water.
4. Pressure wash both sides of screen.
